Welcome to the OET Speaking at Home User Guide

OET Speaking at Home is taken online in the comfort of your own home. To help you feel confident and prepared, this guide outlines what you need to know before and during your sub-test.

We wish you all the best for Speaking at Home!

About Speaking at Home

The OET Speaking at Home is delivered individually, takes approximately 20-30 minutes, and consists of two role-plays. Each profession has specifically designed materials that draw on real healthcare scenarios.

A designated interlocutor (someone who participates in dialogues and conversations but does not assess you) will be your partner for the role-plays and throughout the sub-test. They will begin by asking a few warm-up questions to help you relax, but don't worry, this part of the conversation is not assessed.

[Find out more](#) about Speaking at Home.

Where to sit Speaking at Home

There are a few guidelines to help you choose a suitable location for taking the sub-test. Most importantly, it should be a quiet place with minimal distractions, and you should have a comfortable workspace. Please ensure that:

- the location is indoors, well-lit and fully enclosed with solid walls. Transparent glass panels or walls are not permitted.
- you are alone during the test. If someone enters the room, the test will be stopped and your results will not be released.
- the workspace is clean and free of clutter.

You can find a detailed checklist on the following pages.

What to bring

- ✓ Valid ID. You must have your original, valid (unexpired) and acceptable ID for OET with you on test day.
- ✓ Your computer or tablet with a webcam and a stable internet connection. Check our system requirements section of this guide for more information.
- ✓ A clear plastic bottle of water, with no label
- ✓ One blank piece of paper (with your confirmation number only recorded on it) and a pen or pencil so you can make notes
- ✓ You will need a medium to a large mirror (e.g. 30cm x 30cm) for the environment check

What not to bring

- ✗ Bags of any type, including a pencil case
- ✗ A mobile phone
- ✗ Headset/earphones of any type
- ✗ Dictionaries or reference materials
- ✗ A watch
- ✗ Any electronic devices (including cameras)
- ✗ Heavy coats or jackets
- ✗ Correction fluid/tape
- ✗ Mechanical pencils and highlighters
- ✗ A passport holder or document sleeve

System requirements

Here's a comprehensive list of equipment requirements to prepare your workstation for test day.

| Hardware Requirements - Laptop, desktop or tablet | | | |
|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|--------------------------------------------------------------------------|
| Processor (CPU) | Minimum: Intel i3 (8th Gen or higher) / AMD Ryzen 3 or equivalent | | Recommended: Intel i5 (10th Gen or higher) for better performance |
| RAM | Minimum: 8 GB | | Recommended: 16 GB |
| Camera | You'll need an adjustable web camera to show the proctor your test setting. | | |
| | Standard Definition: 480p | | Recommended: 720p or higher. |
| Monitors | Please note that we don't allow dual monitors for the test (i.e. a desktop with two monitors or a laptop with a separate monitor). | | |
| Power source | Plug your device directly into a power source, do not use a docking station. | | |
| Speakers & Microphone | Built-in or USB plug-in (Bluetooth is not allowed). | | |
| Supported Tablets | Tablets must run the operating systems listed below. Tablets running Windows 10 must run Windows 10 Home, Pro, or Enterprise. S Mode is not supported. | | |
| | | | |
| Operating System | Windows: Windows 10 or 11 (64-bit) | macOS: macOS 10.15 (Catalina) or later | Linux: Ubuntu 20.04 LTS or equivalent |
| Supported browsers | Google Chrome (Latest Version) | Mozilla Firefox (Latest Version) | Safari (Latest Version for macOS users) |
| Network requirements | | | |
| Internet | Broadband or wireless (minimum 3G or 4G/LTE). | | |
| Internet speed | Minimum: 5 Mbps upload/download for standard quality | | Recommended: 20 Mbps upload/download for HD video calls |
| Latency | Less than 50 ms for smooth video and audio transmission | | |
| Connection type | Wired Ethernet connection is preferred. If using Wi-Fi, use a stable 5 GHz band router. Position your device where you'll receive the strongest signal. We also advise to connect your laptop or desktop to the router with an ethernet cable, or adapter if using a tablet | | |

Before test day

There are four key actions you'll need to take to ensure the sub-test runs smoothly.

Download the Secure Browser

- Go to www.prometric.com/specandidate to download the Secure Browser required to access the secure Speaking Platform.

Record your confirmation number

- Record your confirmation number and password ONLY on your blank piece of paper (these can be found on your test booking confirmation email).
- You'll need this to log in to your test.
- Please do not include anything else on this paper.

Review your set-up

- Ensure your testing area meets the requirements listed.

Test Internet Strength

- If possible, use a wired Ethernet connection for stability.

On test day

When it's time for Speaking at Home:

- Open the Secure Browser at least 10 minutes before your test time. This will secure your device for testing, run checks and launch the Speaking Platform.
- When prompted, enter your confirmation number and password.
- Ensure your ID is ready to hold up to the camera for verification.
- Once logged in, you'll wait in the virtual lobby until the interlocutor joins your session.
- The interlocutor will then guide you through a short series of security checks before the test begins.

Candidate detail confirmation

- You will be asked to hold your ID up to the camera for verification.
- Once your ID is positioned clearly, you will be prompted to click the “Take Photo” button to capture the image.
- After that, you will also need to position yourself for a photo and click “Take Photo” again to complete facial verification.

Note: If the ID you are using was issued in a different country from where you are sitting the test, you may also be asked to present proof of residency (e.g., visa, rental agreement, or hotel booking that matches the test date and location).

360° environment check

The interlocutor will guide you through a 360° check of your testing environment to ensure it meets OET's security requirements.

You will be asked to use your webcam to show:

- a full view of your room
- your workspace
- your computer screen and keyboard

The interlocutor may request that you:

- remove items from your workspace
- relocate objects that could raise concerns
- adjust your setup to meet test conditions

To assist with this process, we recommend having a medium-to-large mirror (approximately 30cm x 30cm) so you can reflect hard-to-see areas like your screen and keyboard back to the interlocutor.

Candidate person check

The interlocutor will ask you to complete a personal security check by doing the following:

- Raise your pant legs above your ankles
- Turn all pockets inside out
- Lift your shirt sleeves above your wrists
- Remove your glasses and show them to the camera for inspection
- Pull your hair back to ensure your ears are visible and no devices are present
- Remove any large jewellery
- Show your clear plastic water bottle with no label
- Ensure your ID remains visible on the desk throughout the test

Test environment reference imagery | Do

Do

Clear, orderly and well-lit room/workspace

Candidate is sitting in an upright position

Candidate is alone during the assessment

The computer must be on a table/desk

Test environment reference imagery | Do not

Do not

Poorly lit room or workspace

Cluttered or crowded room or workspace

Candidate is sitting/reclining on a bed or couch with computer on lap

Person(s) or pet(s) present in room or area at any time

Use a dual-monitor configuration to take the test

Troubleshooting and problem-solving

If the internet drops out

- If your internet connection is disrupted during the sub-test, please rejoin the session immediately.
- After reconnecting, your interlocutor will conduct another 360° environment check before resuming the sub-test.
- If your internet drops multiple times and you are unable to complete Speaking at Home (approximately 16 minutes total) without interruption, the interlocutor may advise you to rebook your sub-test once a more stable internet connection is available.

Getting technical support

If you experience issues accessing the Speaking Platform, logging in, or staying connected you can contact Prometric support directly.

Live chat support is available via the link on

www.prometric.com/spcandidate.

Note that live chat function cannot be accessed while you are logged in to the Secure Browser. You will need to exit the Secure Browser to access

www.prometric.com/spcandidate

You will need to provide your Speaking at Home confirmation number when contacting support.

OET support
